Consulation Supplies

Welcome to Consulation Supplies, specialists in the supply and distribution of electro-mechanical insulating materials solutions.

We stock, supply and distribute a wide range of insulating materials for sectors that include armature winders, transformer manufacturers, engineering works and element manufacturers. Our products include polymers, transformer kits, insulation kits, machined components; we also have an onsite conform machine where we extrude copper and aluminum to size.

What we can do for you

We also have a machining and manufacturing capability that enables us to supply and add value to the end product.

Our materials are backed by specification sheets and test certificates where applicable. We have teams of professionally qualified planners, engineers and management with more than 90 years of collective experience in the industry.

More about Consulation Supplies

Consulation Supplies is diversified into five divisions focusing respectively on conductors, transformers, insulation and polymers in order to provide comprehensive professional services in all sectors of the electro-mechanical insulating environment.

Consulation Supplies has developed a supply chain of leading international and local manufacturers that enables us to import and supply quality products at competitive prices. We source new products that are in demand and stock sufficient levels based on customer prerequisites.

Our continued growth is due to our focus on the products we sell and the clients we serve by building long term relationships. We operate across South Africa and the African continent.

Consulation Supplies company overview

Consulation Supplies was established 2007 as a privately owned business. Our commitment to product excellence and customer satisfaction has ensured rapid and sustained growth.

Today we have offices in Gauteng, the Western Cape, Welkom and the Eastern Cape. In Gauteng's East Rand and Cape Town we have workshops of respectively +/- 2500m² and 400m², Welkom operation 1200m²

We are currently developing a marketing footprint across the African continent.

Consulation Supplies is a BEE compliant enterprise.

Consulation Supplies is diversified into four specialised divisions:

- **Wire division** Enamels (round), textiles (bare, mica, paper, glass yarn).
- **Transformer division** Kit manufacture for both dry type and air cooled transformers, corrugation, blocking, strips, duct wrap, slit to size, T strip, dovetail strip, clack spacer, cylinders, collars and stress rings, etc.
- **Insulation division** Repair kits for traction motors, dry type transformers, cable kits and slit to size, etc.
- **Polymer Division** Local manufacturing of varnishes, resins, paints, putty, degreasers and primers.

Our Target Market

- Armature winders.
- Generator manufacturers and repairers.
- Transformer OEM and repair market for both distribution and Power Transformers (oil cooled and Dry Type).
- DC Traction market.
- AC High Voltage rotating machines; both OEM and repair market.
- Electro magnets; lifting and over band OEM and repair market.
- Applications where insulation is required to handle high heat or high voltage; we supply a wide range of industrial laminates.

Our Supply Chain

Consulation Supplies is an approved and appointed exclusive distributor for several most reputable international suppliers in countries that include Italy, Spain, Switzerland, India and China.

- All materials are backed with full specification and data sheets.
- All polymer products have specification and MSDS.
- Price lists for each market sector are available on request.

The Consulation Supplies products list includes:

The materials we operate in include:

- Aluminium.
- Copper.
- Industrial Laminates.
- Insulation.
- Transformer Insulation.
- Polykearn.
- Round enamelled copper wire.
- Textile conductor in both copper and aluminium (glass/mica/paper).
- Sleeveings.
- Cables.
- Slot insulation- Class B/F/H/C.
- Wedging material.
- Baking and air drying varnishes.
- VPI/trickle resin.
- Paints, primers and degreasers.

Our services include:

- Resin/varnish testing.
- Insulation breakdown up to 12Kv.
- Thermal ageing.
- Insulation system design.
- VPI design and commission.
- Slitting, wroughting, pressing, machining and corrugating.
- Cork.
- Transformer board (mouldable/LD and HD).
- Transformer paper- Diamond dot and Kraft.
- Strips, blocking and machined components.
- Adhesive tapes.
- Textile tapes.
- Mica based products.
- Industrial laminates- Phenolic cotton/paper, GPO3, silicone glass, epoxy glass, silicone mica and glastic board.
